Comments:

TrueERP has definitely helped us manage our daily business. For the most part it is user friendly and I would recommend the software to a friend or colleague.

Pros:

TrueERP is great because it incorporates all parts of our business. We are currently running about 90% of the business through the software.

Cons:

It can be glitchy and I also wish the support was better and more reliable. It would also be nice to get updates when new versions become available. I am definitely interested in getting the next production version!
